Guide to reading results

DATA TABLES:

- Non-responses (when a question was asked but the respondent did not provide an answer) have been excluded when calculating results to better reflect respondent sentiment. This is consistent with how results will be calculated in your school's final report on Panorama, which will be provided by the department later in the year.
- Grey rows in the report contain factor averages. Factor averages are calculated as a sum of the count of % Positive, % Neutral or % Negative parent responses across all the questions in the factor, divided by the total number of parent responses across all questions in the factor.
- An asterisk (*) indicates that a result has been suppressed due to low sample size (less than 3 parents/caregivers/guardians answering the question) to prevent the possible identification of individuals. For factor averages, questions that have been suppressed are excluded from the calculation of the factor average.
- A caret (^) indicates that the % Positive figure represents the percent that responded 'Disagree' or 'Strongly Disagree' with the statement.
